COMMERCIAL GENERAL CONTRACTORS

## **DOWNTOWN YMCA 2 West Franklin Street Richmond, Virginia**

Woolfolk Construction recently completed the new additions and interior renovations for the reputable Downtown YMCA branch located on West Franklin Street in Richmond Virginia. This in-fill project comprised over 20,000 square feet to include a wellness/fitness center, outreach and education space and support office space. The unique aspects of construction involved the structural integration of three adjacent buildings, conversion of the exterior courtyard into an interior atrium, and improvements along Franklin Street. Ingress and Egress for members was maintained throughout the construction and the YMCA staff handled the phasing in expert fashion. In spite of staging obstacles, the project was completed ahead of schedule.
