The Shoppes at Bellgrade

Originally anchored by Safeway International (now Hannaford), the Shoppes at Bellgrade is the focal point and front door to the 160 acre mixed-use Bellgrade Plantation. The architectural design is a blend of gables, cupola, vaulted canopies, and, yes, working weather vanes. The false mansard is constructed with green, standing seam metal and artificial composite slate shingles. Woolfolk Construction coordinated all the sitework infrastructure, shell and shop interiors, along with the grocery store.
